## PROFILE

I am a software engineer with a passion for full-stack web development who has dedicated himself to consistent and effective self-learning in both the technical aspects of his profession, and soft skills such as critical thinking, interpersonal skills, and time management. I love what I do, and I cannot wait to meet my new team and get to work!

## EXPERIENCE

SOFTWARE DEVELOPER, COMPOSITIONAL IT LTD. – LONDON, UK – 2019-2021

**My Role:** As a software developer at Compositional IT, I have collaborated directly with both the more senior members of the team in a tight-knit agile environment, and the software departments of world-class corporations such as Colliers and Lufthansa, to provide consultation on functional programming in .NET as well as producing software solutions to day-to-day problems in both cross-paradigm (functional and object-oriented) legacy applications and greenfield projects.

**Tech Stack:** .NET Framework/.NET Core (Saturn, Fable, Elmish, MVC, WebAPI), Microsoft SQL Server 2016-2017, Microsoft Azure (Storage, App Service, Active Directory, and more).

## PORTFOLIO

You can find all the projects I have developed as a part of my portfolio as well as blog posts I have written on numerous technical topics on my personal website at [www.alicandev.com](http://www.alicandev.com). For your convenience, here is a list of those projects.

### GOTEAM! – KANBAN BOARDS

**Description:** A Django-REST application with a React.js frontend, which is a fictitious kanban board app for small teams that allows admins to assign tasks to members, and gives members edit rights to only the tasks that they're assigned to.

**Live Demo:** <https://goteam.online>

**GitHub Repo:** [https://github.com/alicandev/portfolio\\_goteam](https://github.com/alicandev/portfolio_goteam)

### BLAZIN PIZZA CO. – ONLINE PIZZA STORE

**Description:** A full-stack JavaScript application (MERN Stack) that I've built in an effort to put all my JavaScript knowledge into a single coherent project. It simulates the workflow of a pizza store app where both guests and members can order online.

**Live Demo:** <https://blazinpizza.co>

**GitHub Repo:** [https://github.com/alicandev/portfolio\\_blazin-pizza-co](https://github.com/alicandev/portfolio_blazin-pizza-co)

## GITHUB FINDER – USER AND CONTENT SEARCH

**Description:** A React application that incorporates two different APIs (GitHub Search and OpenStreetMap) to allow its users to search through GitHub profiles and view their repos, gists, followers, following, and location as well as the content thereof.

**Live Demo:** <https://githubfinder.icu>

**GitHub Repo:** [https://github.com/alicandev/portfolio\\_github-finder](https://github.com/alicandev/portfolio_github-finder)

## LANDING PAGE – ONLINE PORTFOLIO

**Description:** The landing page of my online portfolio itself is a React application! Even though it fundamentally is a static website, I've chosen this approach to give myself even more of an exposure to React, since React is my "go-to" when it comes to front-end development.

**Live Demo:** <https://www.alicandev.com>

**GitHub Repo:** [https://github.com/alicandev/portfolio\\_landing-page](https://github.com/alicandev/portfolio_landing-page)

## EDUCATION

I am completely self-taught. However, I am a persistent self-learner and I am committed to self-improvement as much as I'm passionate about programming. You can view the LinkedIn courses that I have finished on my profile, which make up a considerable minority of my programming-related learning, the majority being comprised of in-depth hands-on/docs learning and book reading.

## SKILLS

<b>Programming Languages:</b>	Python, JavaScript/TypeScript, C#, F#, HTML, CSS, and Sass.
<b>Frameworks and Libraries:</b>	Django (Django-REST), React/Redux, Node.js (Express), ASP.NET (MVC and WebAPI), Saturn, Elmish, and Fable.
<b>Database Administration:</b>	PostgreSQL, MongoDB, Microsoft SQL Server, and SQLite.
<b>Cloud Platforms:</b>	Microsoft Azure (Storage, App Service, Active Directory and more), Amazon Web Services*, and Google Cloud Platform*.

*\* Limited capability, but a keen interest to explore.*
